Rasmuson Foundation Board Portal - Executive Dashboard

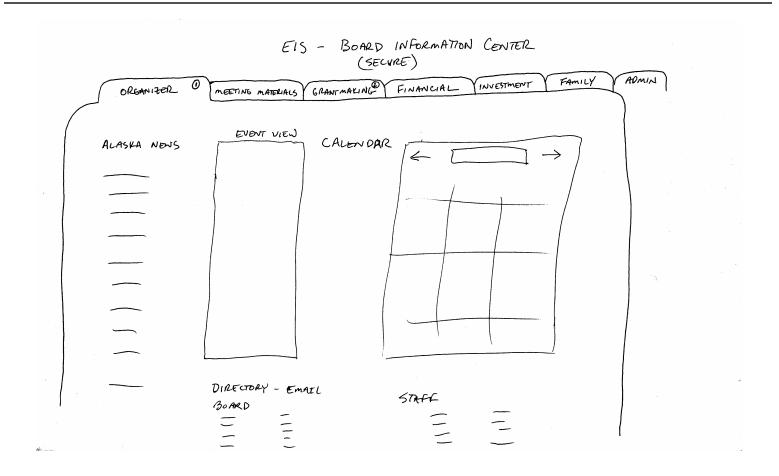

A User-Centered Design Approach Can Result in an Intuitive Interface

"A usable interface becomes invisible; sometimes you know you've gotten it right when your customers/users don't talk about how usable the product is . . . they're too busy raving about how you've made their life better."

Don Norman, useit.com, "The Design of Everyday Things"

On this date in 1901, Andrew Carnegie gave \$5.2 million to New York City libraries.

Andrew Carnegie, at one time the richest man in

America, was born in Scotland in 1835 and emigrated when he was 13. After making his fortune in railroads, telegraphs, oil, and steel, Carnegie retired and sold his company to J. P. Morgan in 1901, dedicating his last years to philanthropy. In addition to the donation to the NYC libraries, he helped to establish teacher pensions, research foundations, and peace endowments. By the time he died in 1919, Carnegie had given away nearly \$325,000,000.

CLASSROOM ACTIVITY

With Carnegie's gift in mind, today would be a perfect day for students to practice their expository writing and/or persuasive writing skills.

For expository writing: ask students to explain how they would give away \$1,000,000. Ask older students to establish criteria for a worthwhile cause. These might include criteria such as a cause's benefit to world peace, support for education, promotion of skateboarding, etc. Then ask students to explain why five individuals or groups fit the criteria and therefore deserve a portion of the money. For younger students, tell them that they have one day to donate all the money to at least three people. Ask who would get the money and why.

For persuasive writing: ask students to imagine that they are writing to the Carnegie Foundation in order to fund a project at their school. They should identify a specific need at their school and then convince the donors that their school deserves this money. Writing should include specific information about how the money would be used to benefit their school.

If you have students write both the expository and persuasive pieces, ask them to compare the essential features of the two modes of writing. Students may find ReadWriteThink's Persuasion Map interactive useful for this activity.

Leonardo da Vinci and the Spirit of Invention

Born into very modest circumstances on April 15, 1452, Leonardo da Vinci became the quintessential Renaissance man – a consummate inventor whose boundless curiosity and imaginative creativity led him to spectacular achievements in the arts and sciences. Share with your students the spirit of invention that Leonardo so fully embodied with this month's **MarcoGram**. Use the activities below to get started, then scroll down for more links and resources on this topic.

This newsletter is created in HTML. If you are unable to properly view the animation, images or hyperlinks, please view the online version at http://www.marcopole-education.org/MarcoGrams/Apr2005.html.

Warm-up Activities

Presumed self portrait of Leonardo da Vinci, c. 1513.

1. Leonardo da Vinci invented many products – from armored tanks to helicopters – that were too advanced for his time. Centuries passed before many of his inventions were developed by other people. Innovators improved and updated Leonardo's inventions to make them more useful for modern times, and entrepreneurs invested money to manufacture and sell the inventions.

Think of some products you use every day, such as your toothbrush, lunchbox, telephone or sneakers. How do you think these products have changed since they were first invented? What features convinced you or your parents to buy these particular products?

Tell the class that they will develop a product that will remind students to do their homework. Ask them to be "inventors" and brainstorm some ideas for such a product, and write each idea on the blackboard. Next, ask students to be "innovators" by selecting one invention from the list and improving and refining it into a final product. Finally, ask students to assume the role of "entrepreneur" and develop marketing ideas that will encourage people to buy the product.
